

# CHRIST'S FAMILY CLINIC SPRING NEWSLETTER

2023

*The mission of Christ's Family Clinic is to provide high-quality health care to the uninsured in an atmosphere of dignity and respect, regardless of race or religion.*

## TENNIS COMPETITORS OF DALLAS SUPPORTS CFC 3 YEARS IN A ROW

Christ's Family Clinic was thrilled to receive the news that the Tennis Competitors of Dallas will be supporting our Clinic for the third year in a row. TCD provides annual grants to organizations in the Dallas community that support women's health. We are so grateful for their continued partnership.

## WE ARE PLEASED TO ANNOUNCE 6 NEW BOARD MEMBERS!

Christ's Family Clinic has very exciting news to share! On Monday, April 10th, the current Board of Directors voted in favor to add six new Board Members. We are pleased to announce these individuals have enthusiastically accepted the invitation. We are so thrilled to welcome them!

Each of our newest members have been longtime supporters of the Clinic. They have volunteered their time, services and talents. We are truly grateful for their continued generosity by serving the Clinic in this way! We have a fantastic and vibrant Board of Directors who continue to ensure the mission of our Clinic is fulfilled with each patient that walks through our doors.

MICHELLE AND JOSH MCARTOR

TAMARA AND MICHAEL SWALDI

**DID YOU KNOW? IN 2022, THE CLINIC HAD OVER 1,300 PATIENT VISITS FROM MORE THAN 100 DIFFERENT ZIP CODES!**

# PATIENT STORIES

**"Our patients would go without health care if they were not able to receive it from us."**

**Dr. Katrina Bradford, Medical Director**

**"We recently saw a 46 year old male who we had diagnosed with new-onset diabetes last year. Initially his blood sugar was high and his diabetes was not well-controlled. He completely changed his diet and started going to the gym for exercise. He gave up alcohol completely. His blood sugar has normalized and he does not need medication to control his blood sugar."**

**Dr. Kristen Lampe, Clinic Physician**

**"In February we saw a 63 year old woman who was experiencing severe back pain. She was losing weight as well. Results of her blood work and imaging suggested a possible cancerous condition. She was able to transfer her care to Parkland, where she just completed her second round of chemotherapy. She lives alone and is now trying to arrange for family to come to assist her."**
